

Gear in motion

ORCA MINI AUDIO BAG MODEL: OR-28

The Orca Mini Audio Bag has an internal honeycomb frame, which create a durable "cage" that expertly protects the gear inside the bag.

The bag comes with two handles and a padded shoulder strap.

The bag can be accessed from all 6 directions, which helps the operator to arrange and access the equipment inside

easily. There are two extra pockets, one at the front for storing headsets, cables, batteries, etc. The back pocket can hold a small battery.

The bag's top is made from transparent TPU, that can be positioned in any direction to the operator's preference. The inside of the bags has two options to position the mixer: a sponge and

two lifts. These two features help the operator to adjust the mixer to the position they need. The special sliding secure buckle system safely holds the mixer in place.

The OR-28, is the smallest Orca Audio bag and was designed to hold the new ZOOM F8, the Zaxcom Max, Tascam DR70, and smaller size mixers.

Model	Internal: cm/Inch	External: cm/inch	Weight: Kg/ Lb
