

ARRILITE 750 Plus  
ARRILITE 2000 Plus

# ARRILITE Plus lighting kits

---

ARRILITE lampheads are also available in a variety of lighting kits. For detailed information please contact your local dealer or visit the ARRI website.

## ARRIMAX reflector

The new ARRILITE fixtures utilize the same reflector and optical system as the ARRIMAX 18/12, the designers of which won a Scientific and Engineering Award from the Academy of Motion Picture Arts and Sciences in 2010. This innovative system features adjustable beam control, resulting in a highly efficient and controllable light source.

## 4-leaf barndoor and scrims – ARRILITE 750 Plus

The reduced diameter of the new ARRILITE 750 Plus enables usage of the 4-leaf barndoor and scrims designed for the ARRI 650 Plus, which is therefore ideally partnered with the ARRILITE 750 Plus in a kit, as they share the same accessories.

## Accessory holder – ARRILITE 750 Plus

The new ARRILITE 750 Plus accessory holder provides a stable mount for scrims and the barndoor, while also incorporating fittings that permit the Chimera Video PRO Plus S to be fitted directly, without an additional speedring.

## Housing

### ARRILITE 750 Plus

- Compact design makes it smaller and lighter than the previous ARRILITE 800
- Rugged aluminium housing enables heat dissipation

## No tools required for changing bulbs

### ARRILITE 750 Plus

The housing consists of two parts, which are connected by a bayonet cap. In order to change the bulb, the rear part is easily disconnected without any need for tools. To open the light, the user pushes the release slide on the handle and turns the whole rear part to the left. In order to close the light again, the user closes the two housing parts together so that the position marks are aligned and then turns the rear part to the right until the bayonet cap locks.

## Light output – ARRILITE 750 Plus

The combination of the ARRIMAX reflector and a 750 W HPL\* bulb results in a 21% increase in light efficiency, as compared to the previous 800 W ARRILITE lamphead. Although listed as 750 W fixture, the ARRILITE 750 Plus can also be fitted with lower wattage bulbs, ranging from 375 W to 800 W.

\*HPL lamp invented by and licensed from David Cunningham

## One-arm stirrup – ARRILITE 750 Plus

An innovative one-arm stirrup sets the ARRILITE 750 Plus apart from competing lights and enables many different pan-and-tilt options. Sturdy and compact, it reduces the overall size of the lamphead for easy packing and transportation.

## Disc brake

The yoke brake on the ARRILITE 750 Plus and 2000 Plus implements the same disc brake technology as ARRI's True Blue range of lampheads, holding the fixtures steady even with heavy accessories attached.

### ARRILITE 2000 Plus

- Improved focus, housing stability, yoke brake and overall functionality
- Rugged aluminium housing enables heat dissipation
- 400 g lighter and far more compact than the previous ARRILITE 2000

### ARRILITE 2000 Plus

In order to change the bulb, the safety mesh frame at the front of the light must be opened; it opens in a similar way to the ARRI M18 and AS18 fixtures. No screws have to be removed and no tools of any kind need be used; changing the bulb in this way is fast and simple.

## Handle

At the rear of the housing is a large, heat-proof handle that facilitates easy maneuvering of the light.

# 750 W ARRILITE Plus

## Order No.

## Description

L3.36700.B	ARRILITE 750 Plus, bare ends, inc. 4-leaf barndoor and accessory holder
L3.36700.D	ARRILITE 750 Plus, EU connector, inc. 4-leaf barndoor and accessory holder

## Accessories
