

GRATICAL EYE

ZACUTO ANNOUNCES THE GRATICAL EYE
THE SMALLEST AND LIGHTEST MICRO-OLED EVF

We at Zacuto are pleased to announce the addition of a new Micro-OLED EVF to our lineup - the Gratical Eye. The smallest and lightest of our three EVFs, the Eye is the definitive focusing tool for the filmmaking professional on the go.

The Gratical Eye weighs only 14 ounces and is about the size of your palm. In order to keep the unit small and compact, it has a 2 pin Lemo jack for power, a single SDI input, and a USB for firmware updates. It has an added exterior tally light, and a screen saver sensor with auto shut off after 30 minutes of no use.

The Gratical Eye is not a replacement for the Gratical HD or X. It has the same software features of the Gratical HD but is targeted towards filmmakers working with professional SDI cameras and external power systems. Please see page 4 for a quick comparison.

The Gratical Eye will begin shipping April 2016 at a list price of \$1950.00.

More information on the Gratical Eye will be posted here www.zacuto.com/gratical-evf on April 13th, 2016 at 9AM CST.

TECHNICAL SPECIFICATIONS - GRATICAL EYE MICRO-OLED EVF
